Assistant System Engineer - Trainee | August 2017 – June 2018
- Worked on various kinds of test suites like selenium, HP Quick Test Pro, etc
- Worked on Front-end development as the final project for the training

PROJECTS

EMPLOYEE MANAGEMENT SYSTEM
C#, ASP.Net MVC Core, Microsoft Security Libraries
- A project to manage employees in an organization
- Primary focus was on addressing Common Weakness Enumeration(CWE) and Security

LAUGHTER CHALLENGE
HTML, CSS, Bootstrap, Javascript
- At hackathon named Game-Jam organized by Poshmark, we as a team created a Try Not to Laugh Challenge where the player will be presented with funny videos and will be tempted to laugh
- Created a webpage which renders a video section and a user camera section
- A miniature machine learning library is used for identifying the player's smile and scoring them accordingly

BLOWFISH CIPHER
Python
- Minor Project on implementing the Blowfish Cipher and using that to securely store credentials in a file
